First Rank. CO., LTD

S w i m T o V i c t o r y

ABOUT

SAEKO was founded in Taipei in 1979 as a specialized swimming goggles manufacturer. In thirty nine years, our R&D team accumulated expertise of ergonomic and industrial design. We are leading at the number of new product development and new patent applying every year.

Based on the enthusiasm for water sports, SAEKO have created numerous Taiwan first products like first anti-fog swimming goggles and optical swimming goggles. We specially develop "ULTRA4" technology for all swimmers. UltraFIT brings most comfortable swimming experience; UltraFUZE is the latest technique which engineered softer seal and lens; UltraFAST Buckle makes preparation so easy; and Ultra Anti-FOG eliminates fog effectively.

SAEKO continuously develop high specification and high quality goggles with our company principle "Integrity, Innovation, Quality." To achieve this goal, SAEKO started to introduce ISO 9002 system into business practice in 1999, upgraded to ISO 9001:2008 in 2009 and ISO 9001:2015 in 2017. By customized MIS system, we also got huge improvement for production efficiency and quality stability.

SAEKO' s product has been spread to more than fifty countries on five continents currently. We offer a wide variety of swimming goggles that are perfect from recreation to profession. We are very proud to say, there are over twenty-five million swimmers have used our products. We guarantee, whether you are a professional swimmer, fitness swimmer or a beginner, you can find your own goggle at SAEKO.

Ultra4

SAEKO

Ultra4 Technology

UltraFIT technology is based on years of Ergonomic experiment from Saeko R&D. It brings most comfortable swimming experience to the swimmers. UltraFIT technology not only fit your face while swimming, light weight structural design also leaves no burden during exercise.

● Features:

1. 3D Ergonomic Design
Ergonomic 3D seat is just like your skin. It reduces the pressure around the eye and also improve perfect waterproof.

2. 39yrs Bio database
Saeko accumulate over 39 year experience in manufacturing swimming goggles. All our goggles designed by Saeko professional R&D team with human biological database. Our goggles are so comfortable like specially design for your face.

3. Super light weight material

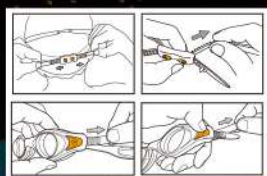

UltraFIT swimming goggles replace old PC plastic frame, it hugely reduce the weight of goggles which brings you comfortable during distance swimming.

We understand the eyes face large pressure at the moment you put on the goggles with stretched head strap. Saeko exclusive UltraFAST Buckle helps user quickly and easily adjust the tightness of head strap. With UltraFAST Buckle, the preparation before each exercise becomes so easy and safe. You can choose different type of UltraFAST Buckle from different models.

● Features:

1. Easy Clip
Through EASY Clips, you can adjust tightness easily. To tighten, pull the ends of the straps away from your head; to loosen, press the clip on the device, meanwhile pulling back the strap.

2. X-FIT

X-FIT provides an extremely simple, quick and effective experience to connect and disconnect head strap. With X-FIT, children could learn how to wear swimming goggles by themselves, and women could wear swimming goggles neatly without tangled hair.

UltraFUSE is a breakthrough innovation of swimming goggles. To enhance waterproof ability and comfort, we combine soft TPE rubber with lenses and frame by latest rubber injection technology. UltraFUSE makes design of goggles more elegant, it also enhance comfort, reduce pressure around your eyes and leak free.

● Features:

1. Soft-Contact Eye Seal
TPE rubber is softer than traditional rubber. Unlike traditional swimming goggles require tight head trap for waterproof, UltraFUSE can significantly release pressure and marks around your eyes.

2. Leak-free

The temperature of your skin will make rubber fit your contour of face, which provides comfortable and waterproof ability.

When you are swimming, the lens easily fog up because cold water contact warm air inside the eyecup. It can block your sight and also cause danger. Saeko exclusive long-lasting anti fog coating can prevent fog or mist, provides clear vision.

● Features:

1. WIDE VIEW Anti-FOG
To enhance anti-fog experience for swimmer or outdoor sport, all Saeko wide view goggles have panoramic anti-fog. It means coating covers all area of the lens, provide clearer sight than traditional goggles.

CERTIFICATE

Certificate of Good Design Product

SAKEO's swimming goggle S15 has been approved by the Good Design Product. Selection Committee as a Good Design Product. This committee is composed of business, government and academic leaders under invitation from CETRA to carefully evaluate all entries. The main criteria used were function, aesthetic value and design process.

Taiwan Excellence Award 2015-2020

SAKEO's design capability is recognized by the Taiwan Excellence Award for four consecutive years since it first applied for award in 2015.

The Solid-Gold Award for Asia-Pacific Contemporary Prime Quality Products

Certificate of being elected for the second Asia-Pacific contemporary solid-gold award, year of 1998.

Certificate of Taiwan TrainQuali System (TTQS)

Received the "Taiwan TrainQuali System-Enterprise TTQS" gold award.

ISO 9001:2015 Quality management systems & customized MIS system built in

Saeko started to introduce ISO 9002 system into business practice in 1998 and upgrade management system to ISO 9001: 2008 in 2002. With customized MIS system, we have the ability to provide stable quality with required spec. and to improve production efficiency.

Golden Award from EECA Taiwan

We are honored to be rewarded Golden award from EECA Taiwan. (EECA is an association which resolving & promoting public health and consumer protection issue.) We commit to make quality products to maintain this good reputation.

WH-RD

FEATURE

Pacific goggles with revolutionary Polarized Lenses.

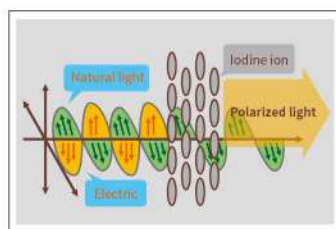

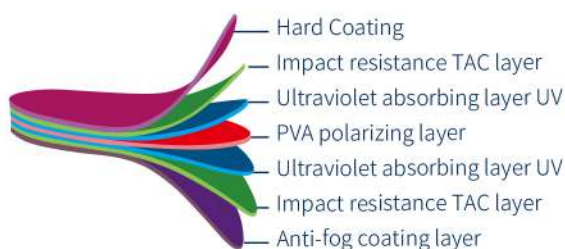

Polarized Lens

TAC Polarized Lens

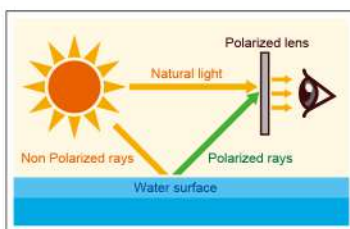

Lens color: Light smoke Lens origin: Japan Block vertical glare: 99%

BENEFITS

- Double TAC layers enhance the structure and prolong the product life.
- Comfortable vision let swimmer more concentrate on the water sporting activities.
- Even the reflected sunlight from the sand beach, Polarized lenses reduce eyestrain from light reflecting of both the sand and the surface.

Principles of polarization

Function

Normal Lens

Polarized Lens

FUNCTION

- High quality polarized lens can eliminate 99% vertical glare and almost 100% UV lights.
- Has one's eyes tested and wear goggles with the polarized lens, the feeling of color is more accurate and gentle nature compared to other materials. When being engaged in outdoor activities, the polarized lens goggles can reduce dazzle glare to minimum.
- Under circumstance abundant with refracted lights, our eyes are easily irritated by strong lights and thus we feel that a halo surround the light source. The feeling of view in our eyes is just like overexposing under the sun. Our eyes become irritated, and image saturation decrease because of overexposing.

Swimming became part of the first modern Olympic Games in 1896 in Athens. In 1902, the Australian Richmond Cavill introduced the front crawl to the Western world. In 1908, the world swimming association, Fédération Internationale de Natation (FINA), was formed.

Butterfly was developed in the 1930s and was at first a variant of breaststroke, until it was accepted as a separate style in 1952. Swimming in competition should create the least resistance in order to obtain maximum speed.

Waterproof Music Player 8GB

GOOD
DESIGN
AWARD
2017

Certificate Nr : INF5028

FEATURE

Waterproof, ear-free, bone conduction MP3 player which allows you to enjoy high quality music when doing water / outdoor sports. It weight only 34g (1.2oz), similar to a standard slice of toast, yet it carries 800-1000 songs and the battery last 8 hours.

No need to wear earbuds

Provides the best music experience for indoor and outdoor activities.

Midrange and treble path

Bone-conduction

Bass path

Water as the transmission medium

The effective transmission distance within one meter will not disturb other swimmers.

SPECIFICATION

Application	Swimming / Biking / Jogging	Size	7.4cm(L) x 4.1cm(W) x 1.65cm(H)
Water Proof Level	IPX8	Support Music Format	MP3, WMA, WAV
Storage Size	8GB	Weight	34g
IO Interface	Special USB interface	Frequency Response	20-20KHz
Battery	Li battery 300mA	SNR	>70dB
Operating Time	8 hrs when the battery fully charging	Operating Enviroment	0°C~40°C
Charging Time	50 minutes	Accessory	USB cable/Earplug/Head band
Speaker	Pizeo Vibrate Speaker	Support OS	Windows XP/Vista/7/8/10,Mac

QUALITY ASSURANCE

Salt spray test :
48 hours under
ASTM B117 standard

Safety test :
FCC / CE / BSMI

Drop test :
1.7 meters, 18 times

Key test :
50,000 times

Waterproof test :
2 hours, IPX8 3 meters
underwater

Magnetic wire test :
350g , 3 minutes
